

Absolute Scale: 1:280,000

NARRATIVE:

METHODS: GIS datasets downloaded from WA Dept of Ecology representing currently adopted and suggested shoreline streams and waterbodies were merged to generate a dataset that includes all features from both datasets. An in-house Skamania County GIS dataset of the approximate Columbia River OHWM was used to represent the Columbia River. All described data were combined and GIS tools were used to identify areas within 200 feet of the water feature. The area of Northwestern Lake as represented in DOE data was adjusted because the lake no longer exists due to Condit Dam removal. The jurisdiction area was clipped to only areas within Skamania County. Areas within city limits of Stevenson and North Bonneville were removed from the jurisdiction area. The resulting dataset was used to identify NWI wetlands that are associated with the shoreline area.

An asterisk (*) on water feature labels indicates the feature is a Shoreline of Statewide Significance.

SHORELINES DISCLAIMER: Shoreline jurisdiction boundaries depicted on this map are approximate. They have not been formally delineated or surveyed and are for planning purposes only. Additional site-specific evaluation may be needed to confirm/verify information shown on this map. Shoreline jurisdiction will be determined at time of project review using the best available site-specific information.

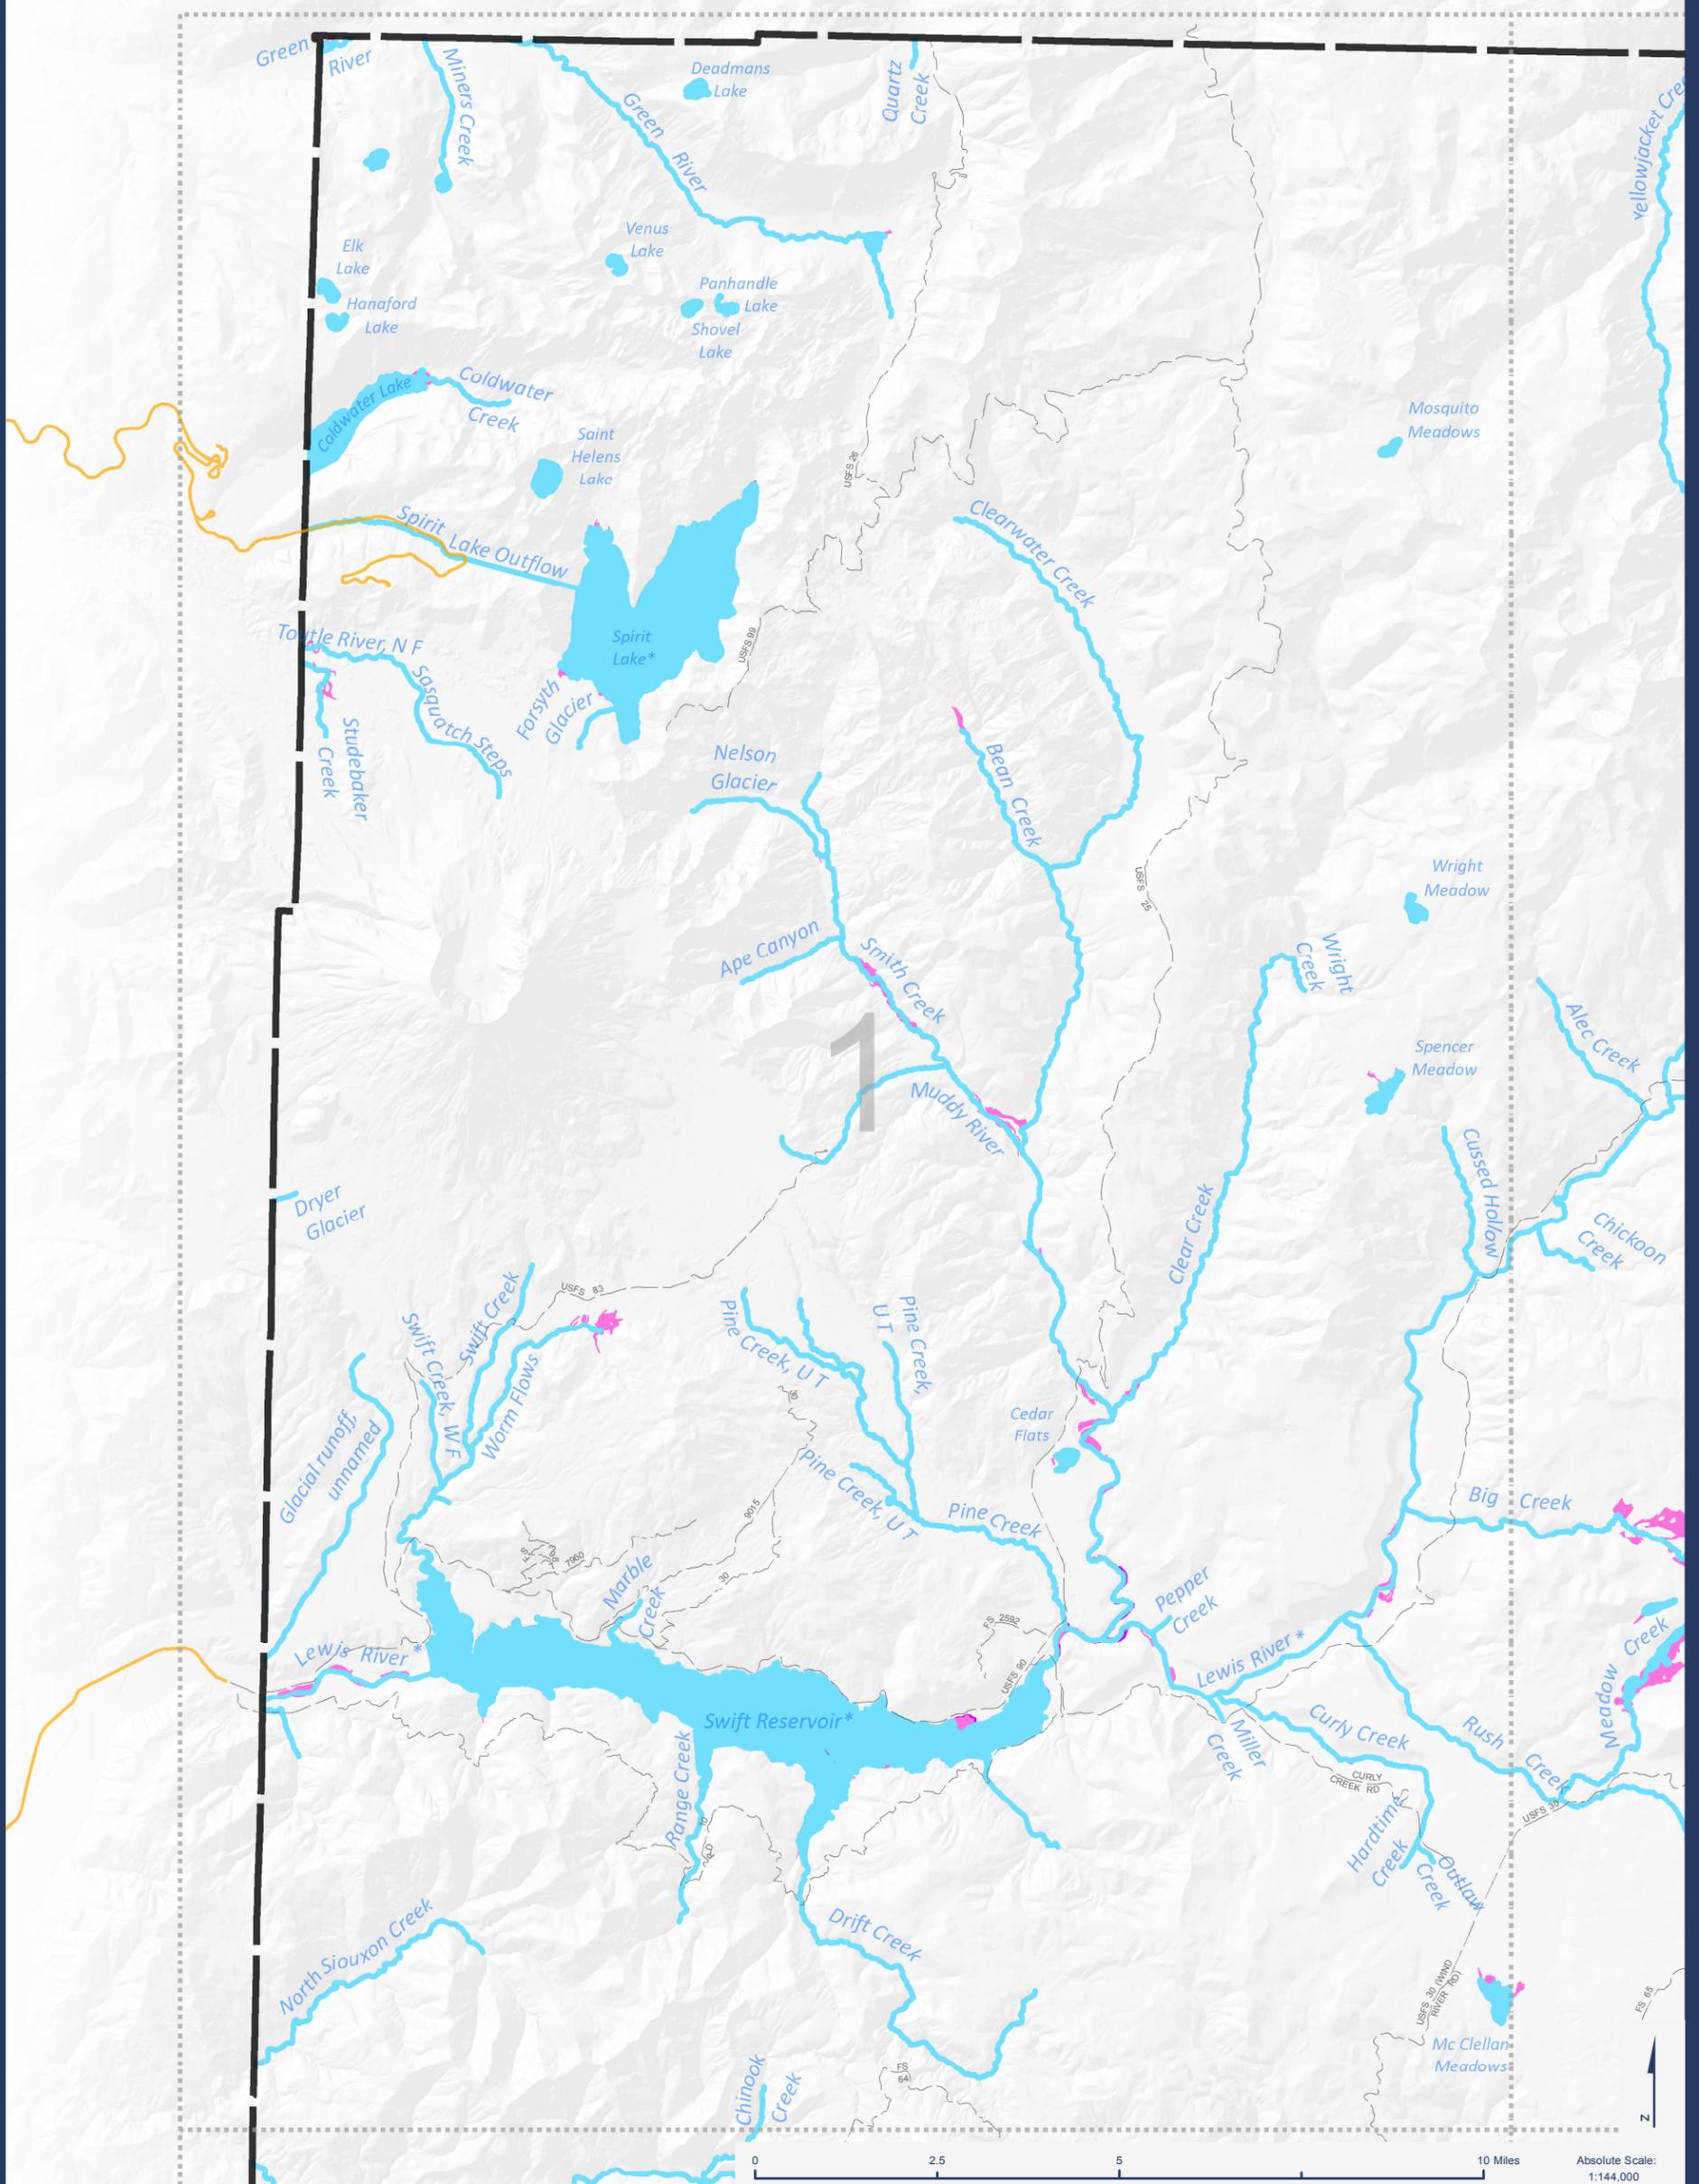

LEGEND:

- Preliminary Shoreline Jurisdiction (Streams/lakes)
- Preliminary Shoreline Jurisdiction (Associated wetlands)
- Preliminary Shoreline Jurisdiction (Optional floodplain areas)
- Skamania County boundary
- Nat'l Scenic Area Bndy
- Urban Area Bndy
- City Limits
- Cascades East/West line
