Community Health

Did You Know?

- Dental caries is the single most common chronic childhood disease - five times more common than asthma and seven times more common than hay fever.
- In second and third grade, 71% of children living in Skamania County experience dental decay, compared to 59% for the rest of the state.
- Flouride is not added to the drinking water in the cities of Stevenson and North Bonneville.

Protect your child with

Flouride Varnish

Wednesday, December 7th
for children 0-5 years of age

free to children with Medicaid

Offered by:
Skamania County Community Health and
Access to Baby and Child Dentistry (ABCD)
